Synopsis

With over 20 years of experience, Dr. Kenneth A. Lane has designed Developing Ocular Motor and Visual Perceptual Skills: An Activity Workbook to help occupational therapists, optometrists, and other professionals develop the ocular motor and visual perceptual skills of learning disabled children. To establish a framework for understanding, each chapter begins with the scientific theories used to develop the activity forms. Insightful suggestions are included on how to solidify the program's success. The easy-to-follow activity forms are then presented, along with numerous illustrations that help develop ocular motor and visual perceptual skills. The forms are divided into as many as five levels of difficulty so both children and teenagers can benefit from each activity. Developing Ocular Motor and Visual Perceptual Skills contains daily lesson plans and practical tips on how to successfully start an activities program. Other helpful features include a glossary of terms and a reference list of individuals and organizations that work with learning disabled children to develop these skills. The first of its kind, Developing Ocular Motor and Visual Perceptual Skills utilizes a learning approach by linking the theories with the remediation activities to help learning disabled children improve their perceptual and fine motor skills. All professionals looking to assess and enhance a variety of fine motor and visual perception deficiencies will welcome this workbook into their practices.Topics include: Complexity of reading Ocular motor Gross motor Visual-motor perception Visual memory Laterality Reversals

Book Information

Paperback: 320 pages

Publisher: Slack Incorporated; 1st edition (February 1, 2005)

Customer Reviews

"Professionals who are looking for a way to assess and address a variety of fine motor and visual perception deficiencies will welcome this workbook into their practices. The book will be of help to parents and teachers as well."Ã¢â ¬â • Savannah Jones, Review Editor, SirReadaLot.orgÃ Â "...if you are in need of suggested activities and possible ways of developing interventions, this text can serve as a starting point."Ã¢â ¬â • Leonard G. Trujillo, PhD, OTR/L,Ã Â East Carolina University Occupational Therapy in Healthcare

Kenneth A. Lane, ODÃ Â is a doctor of optometry and a fellow with the College of Optometrists in Vision Development. Since his first book,Ã Â Reversal Errors: Theories and Therapy Procedures, in 1988, Dr. Lane has publishedÃ Â Developing Your Child for Success, and a series of workbooks that deal with eye tracking and perception. He started the Lane Learning Center to help learning-disabled children in 1980.Ã Â Visual Attention in Children: Theories and ActivitiesÃ Â is the result of 3 years of research. Dr. Lane lives with his wife, Janet, in north Texas and spends his leisure time in Ruidoso, New Mexico.

Great product. Fast shipping

Amazing book. There is no way I would have made it as an OT in an outpatient pediatric clinical as a new grad without this resource.

Very informative and helpful to us.

Excellent resource for occupational therapists.

Has all the information that I was looking for.

This book is used by vision therapists and has helped a lot. I recommend it to anyone wanting to help their child.

Great treatment ideas! I love this book!!

This manual provides a thorough, anatomical background of the visual system. The description of vision disturbances are explained clearly and concisely. It provides concrete strategies to address

vision problems. In addition, it provides references for further exploration.
