## Customer Reviews

"The DVD shows 20 operations. These are clearly described and are a very useful adjunct to the

book. Overall the book would be useful reading for a UK higher surgical trainee studying for the FRCS examination in a relevant specialty and would be an asset in a departmental library." Annals of the RCS, June 2011

I buy it as a gift for every ophthalmology resident passing through my teaching rotation in oculoplastic surgery, and I still refer to it myself! Very clear and straight forward with easy to understand illustrative figures, diagrams and bonus videos. The author narrates as if you're sitting with him in the operating room where he's instructing you during surgery. Fantastic book!

Dr. Nerad's book is great. He has a very plain-spoken, concise way of explaining concepts, and there are great pointers sprinkled throughout the book. I got the Kind Version so I can take it with me to read when I have a moment free in the clinic. It doesn't seem the DVD is included in the Kindle version, which was bit of a disappointment.

Great book for Residents and Fellows learning Oculoplastics.

It is very good.

Great

Great book. Has the ability to convey complex ideas. great personal tutorial with plenty of tips and tricks to enhance your surgical decisions and operations

This book is amazingly good. It's basically an updated improved version of Jeff's previous prerequisites book but so much better now especially with the colour and DVD. It's now the primary textbook of choice for all our trainees and fellows passing through our oculoplastic service. It's very much a personal tutorial and of course there are lots of ways to skin a cat, etc. Others criticise it by citing that it doesn't present a fully comprehensive catalogue of every operation technique for a particular problem but put it this way....every trainee who's used it has become a very competent surgeon using standard recognised techniques which the majority of oculoplastic surgeons would agree with. I now recommend this, Richard Collin's systematic eyelid surgery as the first 2 books to buy for our fellows....Dave CheungBirmingham, UK
