Synopsis

Learn about measures of central tendency while following the lives and work of some brave individuals--tornado chasers! This exciting title teaches readers about the instruments that tornado chasers use, encouraging them to analyze the data that these instruments collect. With these exciting examples, readers will be able to master mathematical statistics, measures of central tendency, box plots, mean, median, mode, and more! This title features eye-catching images, exciting practice problems, easy-to-read text, STEM themes, clear mathematical charts, and an accessible glossary and index.About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Book Information

Series: Mathematics Readers

Paperback: 32 pages

Publisher: Teacher Created Materials; 1 edition (January 27, 2012)

Language: English

ISBN-10: 1433334631

ISBN-13: 978-1433334634

Product Dimensions: 7 x 0.2 x 9 inches

Shipping Weight: 2.1 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Customer Reviews

This series aims to introduce math concepts in the practical context of professional or everyday activities. Hurricane Hunters focuses on analyzing data to find means, modes, medians, extreme

values, range of data, and more. Pack It Up delivers a first-person account of a family s move from a child s point of view connected to the concepts of volume and surface area. A Sense of Art applies calculations of area and perimeter to fields such as architecture, interior design, and fashion design. Photographs and descriptions of structures ranging from the Taj Mahal to the Pyramids at Giza to modern office buildings bring the ideas to life. Tonight s Concert, told from the first-person point of view of a concert manager, focuses on both creating and interpreting graphs based on data. Each book includes math problems, including a two-page problem-solving activity at the end of the book, and brief answers in the back matter. The books overall direction is worthwhile --Booklist, May 2012

Our grandson is interested in meteorology especially storm chasing. This was a great Christmas gift for him and will allow him to learn a little more about this profession.
