Bill Holmes is one of the last remaining links to a bygone era. He first learned about gunsmithing more than 50 years ago from a guy who took his "fix-it" wagon all around doing odd jobs. Since then, Bill has designed and constructed innumerable firearms, written seven books and been featured in two videos for Paladin and become one of the country’s best-known and most highly respected authorities on home-workshop weapons and firearms laws.

Pretty technical, for my reference library.

Great information from a man who has done it all, and learnt his trade by getting out and doing it. Thanks so much for sharing your experience, the good and the bad. Thoroughly recommended for anybody interested in home gun repair or advancing their machining skills to the next level.

Great information. Obviously you won’t learn everything but has a good base to work from.

This is a book that is for the person wanting to do a bit of fabricating. It’s not for the kitchen table type.

Good ref book

The book is OK with one major flaw, it doesn’t tell you how to make a barrel! The author purchases them due to the expensive machinery that is needed to do it. I think that should be disclosed up front since that is the most important part of any gun.

not a great info book

I have found this book to answer all the questions I have and more. This book has been read more than once.
