Skeletal formulas are in the back of the book for quick reference while you color.

Need an escape from every day life that doesn’t leave you feeling like you’re wasting time? Look no further! This delightfully nerdy coloring book will let you bring out your inner child, while reinforcing

basic chemistry principles. Though I bought this for myself, this would also make a great present for the nerd in your life. Great concept--highly recommended!

EXCELLENT

Cute concept

We bought this coloring book for our boys and have really enjoyed getting to know the shapes of each structure! We first turned to H2O as it was the easiest to talk about and break down. We even chose colors for each element! Having several on a page gives them a lot of practice and reinforcement. It’s been a good way for our kids to grow in a basic understanding of chemistry at a tactile level. Our son Isaac says, "I love it!"

This book is great! I even bought one for my mom. So much fun to find a purposeful and unique take on the coloring book trend. What a nice teaching tool, perfect to send home with students, won’t loose pieces like a 3D set! This book has plenty of room for notes, and would encourage even younger children to get excited about learning chemical structures. Who doesn’t love to color and relax (with chemistry)? This book has more examples than I expected, 100% recommend it!!!

Disappointed. Just cut and pasted pictures of the same molecule on each page. No other interesting graphics or pictures of what the molecule does or is used for.

My son is studying chemistry, and I bought this thinking we could talk about a compound and then color it. The compounds are not clearly labeled and it can’t be used for that purpose. I still think this product deserves a bad rating, because even evaluating it strictly as a coloring book, it is inadequate. Instead of one chemical compound to color, think of walpaper. Each page is a field of the same chemical compound repeated over and over, with tiny spots to color, and not that well printed either.

Images are fine but are displayed repetitively on the page with no structural or functional information. This makes it less useful as a learning tool.
