Customer Reviews

...a mini museum between the covers of a book. [Eyewitness series] -- The New York TimesThese books' striking visual impact will draw in even the most casual readers. [Eyewitness series] --School Library Journal

Full-color photos. "The most impressive feature of this book is the quality of the carefully composed images, such as the time-lapse aging of a blossom. Each superb spread contains a complete topic, including how a plant is pollinated, how seeds are spread, and surviving above the snow line. Readers of many ages can appreciate this."--(starred) Science Books & Films.Ã Â Ã Â --This text refers to an out of print or unavailable edition of this title.

Great series! Book as described by seller!

beautiful book

Beautiful book, very fast delivery! Thank you

Bought a bunch of this series for my Grandson for Christmas . . . He loves them so much, I bought the rest for his birthday . . . and his cousins love them so much I am going to have to buy the set for all my kids families.

I love reading this to my 5 year old son for bedtime. We'll choose a few pages and talk about everything we've learned. I always learn something new too.

I use this book in my plant science classes. Wish I had on for each child, good learning tool. Enjoyable.

Good service. Product was as described.

The book was a bit thinner than I thought. (Didn't read the dimensions)It contains lots of basic information on plants, with interesting bits scattered everywhere.The pictures are clean and beautiful.The book comes with a Clip-Art CD, but doesn't even compare to actually looking inside the book. (Very low definition images.) It also comes with a nice folded-poster.Still, overall a very worthwhile buy. I also purchased the 'Insect' book as well and it rates the same.Purchased for $11.85, and got free 2-day shipping with my Student account.Great addition to our home library. 5 stars.
