Bernard T. Lewis was a project engineer for NASA for 10 years and taught engineering management at George Washington University. Richard Payant is the director of facilities management and has 25 yearsÃ¢â ¬â„¢ experience with the Army Corps of Engineers.

Thick book, Goes into great depth on each subject. Can be read straight through or as a reference book to look up individual subjects. As the Operations Manager at a medium size manufacturing facility I found this book to be well worth the price. There are some subjects that seem only feasible for an organization the size of the US military or GM and I have to wonder how big of a readership the author thought he would have among those top .1% of managers. Planning a central call center for our maintenance program is just not feasible but it doesn't detract from the book in any way. You have to discern whats needed at your organization and once you determine that this book will become a well used resource.

The information is good. The book is a good reference. But really, where is this place that gives so many resources to the maintenance department. There are planners, buyers, schedulers, researchers, secretaries, etcÃƒÂ¢Ã â ¬Ã Â|In most places I have worked there is 1 boss and he does all of that. I would like to apply for a position at whatever location these people are talking about. If you buy this book just keep it as a guideline nothing more.

I was not impressed

This book has many issues and errors. Our graduate school class found errors in the problem solution sets and even the problems that were presented left many steps out in their solutions.

This was bought as a gift for my husband who is the Director of Operations for a plastic recycling corporation. He tells me that it is very comprehensive and informative. He keeps it in his office and refers to it to verify specific information.

Very useful of everything I do, very informative and user friendly book. It's a five star for me.

Good Book with good direction. Helpful.

The book is compiled in an easy to reference manner that makes it easy to find the topic you need very quickly.
