Synopsis

The Korat cat is not only one of the oldest natural domestic cat breeds; it is also a very unique breed. One prominent thing about the breed is certainly itÃ¢â ¬â„¢s appearance. Unlike most cat breeds whose heads are wedge-shaped, that of a Korat cat is heart-shaped. Indeed, most proud Korat cat owners point out that the Korat is the only cat with three hearts; one visible when the cat is viewed from the front, the other visible when the catÃ¢â ¬â„¢s head is viewed from above and the actual heart inside the catÃ¢â ¬â„¢s body. The other unique thing about Korat cat is its coat. A pure-bred Korat cat has a single coat with short hair that is very easy to groom. The hair is however unusual. All pre-bred Korats have hair in the same colour; silver-tipped blue. The Korat also happens to be one of the very few natural cat breeds whose traditional characteristics and behaviour have not been altered in any way through breeding programs. The uniqueness in this breed is one of reasons why many homeowners, families and cat lovers decide to buy the Korat cat. In addition to itÃ¢â ¬â„¢s uniqueness, the cat also has a very good character and temperament, which makes it one of the best indoor cats anyone can have at home as a pet. It is indeed not surprising that the breedÃ¢â ¬â„¢s popularity that has remained low over the years is fast rising right across the world. I happen to have had parents who were very fond of cats, to a point where they kept different cat breeds at any given time. Our home was similar to a cattery. The experience of living with such diverse cat breeds, as I now realize, was very beneficial. Not only did I become fond of cats, I have gone a step further and ventured into breeding and showing cats. Covered in this book: - General information - What to know before you buy - Bringing your cat home - Feeding - Grooming - Health - Breeding - The aging cat - Costs - General tips and advice ... and much more

Customer Reviews

THE OTHER 2 REVIEWS BEFORE MY ARE SO TOTALLY INACCURATE...I AM A FELINE VET WHO HAS 3 KORAT KITTENS WHICH GREW INTO FULL GROWN CATS.THIS BOOK WAS SPOT ON WITH THE KORAT BREED...THOSE OTHER 2 PEOPLE MUST HAVE BEEN 3 YEAR OLD'S, OR THOUGHT THEY WERE READING ABOUT HOW TO CARE FOR RATS.OR THEY COULD NOT READ AT ALL.THAT IS MY GUESS!!!

Would give half a star rating if i could, this book is that poorly written. It is full of misinformation and falsehoods.As a Korat breeder who has worked with this breed since 1997 it is full of inaccuracies.The writer claims that the Korat is one of the most expensive breeds of cats...false, pet Korats go for $500 to $800 give or take depending on location and the average price for a pedigreed cat is pretty much the same.While I am aware of some breeds that are being sold for $1000 or more as pets.The writer claims that the Korat is not suitable for people living alone because the Korat is people orientated, this is false...I live alone and I have been breeding them since 1997 and there have been no issues because of it.Breeders will often suggest that people purchase a playmate for a kitten(like getting a littermate) if members of the household are going to be away during the day, but this is just common sense for ANY cat. Korats are a social breed, but that does not mean that they require lots of people, it simply means that those who choose them as a pet should be prepared to give them lots of attention.The writer claims that Korats are not aggressive in any way.This is further proof that the writer is NOT familiar with Korats. Anyone familiar with the breed is well aware of their tendency to behave as "guard" cats and become very protective of their chosen person/people.When I sleep with my Korats,they actually growl when they hear someone entering the apartment building because my is next to the building entrance.They also exhibit that behavior if they see something outside that is "suspect".I have seen aggression between other cats in the household if any Korat feels threatened as well as similar behavior if it involves humans.This is NORMAL and natural behavior of any animal.The writer claims that Korats are not vocal.This is false.Like most Asian breeder Korats are quite talkative and very demanding.Some are more talkative than others but generally they are not a quiet breed.Their vocalization may not be loud but they frequently have a lot to say and will engage in conversations.The picture of the Korats do not look like Korats at all and i have to wonder if they are in fact Korats.If you want to find out about this breed this is NOT the book you should invest in.

Its a joke right?Ok, then I will just point out 3 of the more ridiculous things ind the preview of this book."...GCCF has trained Korat judges able to differentiate the breed from the Siamese breed, which has some resemblance to the Korat".Resemblance, is it that difficult to tell the difference between a Siamese and a blue Korat with green eyes?According to the book Korats are "not vocal" and "not that talkative".If you have ever had a Korat you know that the talk.They actually do full conversations.Korats are RARE.The author claims the cost from 550-1100$.but later he writes that the easiest way to acquire a Korat is "getting one for free from you neighbour".Don’t spend your money on this book
