Synopsis

For the past thirty years, the United States government has secretly trained a select corps of military personnel in the art of "remote viewing" -- the psychic ability to perceive the thoughts and experiences of others through the power of the human mind.... Now, for the first time, Lyn Buchanan -- a world-renowned expert on remote viewing and its potential -- tells the complete, candid story of his experiences. Assigned for nearly a decade to a clandestine U.S. Army intelligence group, Buchanan trained military personnel who utilized their inherent psychic abilities as a data-collection tool during the Iran hostage crisis, the Chernobyl disaster, and the Gulf War. In this incredible account, Buchanan tells how he was selected for his unique psychic abilities, and how he was transformed from an ordinary soldier into one of our nation’s leading psychic spies. Working on top-secret government and military projects using "mental espionage" created permanent, life-altering changes within Buchanan. Now, after many years of analysis and interpretation, he reveals the techniques and mental exercises used to train remote viewers, and demonstrates that each of us carries a dormant psychic ability that we can explore and use ourselves. For anyone interested in a hard, scientific look at the reality of psychic covert operations in the world today, or anyone who has ever wondered if he or she could have the inherent skills to become a remote viewer, this fascinating chronicle of life as a psychic spy will reveal the answers.

I really enjoyed reading Lyn buchanan books and learning about his life and the interesting things he has done and lived through.

This book opens you eyes to a whole other world. To think that remote viewing can be practiced by anyone who commits themselves to training is beyond imagination. Scary stuff people...

A must have book for our collections, I will recommend this book and I will buy again from this seller if I need more from their items on

Very interesting stories. Gives good insight into the human potential of remote viewing and highlights that it is not a toy. I particularly like the exercises at the back.

First part is a good read. One can get lots of useful concepts out of. The second part, the one gives clues and exercise on how one can jump start his/her remote viewing abilities is even much more useful. The exercises might appear difficult to do, or not really effective for the skeptics, but I can attest they work. I have had quite a bit of amazing results since I was able to "reinvent the wheel", a new (little) language made of symbols that we meet in every day's life that the Universe/God/Cosmic Consciousness can use to talk back to us.

Not only is the subject matter of this book fascinating, but Lyn Buchanan is an excellent writer. I read it in 2 day's time, and would have finished it in one day if I had had the time. As you read this book, you can "sense" the honesty here. He is not arrogant. I wish he would write a book about his private experiences of finding missing persons. If he ever does, I will be the first to buy it!
