Customer Reviews

What can I say. This book taught me how to make soap. I still use the basic and luxury bar recipes that are in it and have started my own business. People rant and rave about my soap. If you want to

learn how to make soap, this book is a must have!!! Thank you to the author. She should get a crown or something.

Was recommended to me as a great place to start out, so I bought the book and worked through it in merely a couple weeks and the advice provided was excellent. Moved on to all-natural, organic soapmaking to combine with the natural botanical personal care line we already have. Though most I already knew and I had an advantage with the existing skills and experiences, if I had tried to wing it on my own without this book, I likely would still be toiling away, making dopey mistakes instead of making beautiful all-natural cold-process soaps in only a couple weeks after starting out!

I’m new to soap making and this book is really helpful. It gave me a good understanding of the process and what I will need. My only comment is that it can be a bit confusing in some parts. I will probably have to read most of the book before I’m simply able to use it as a reference. The recipes are listed weird. They have the ingredients, but you have to go back to the "basic recipe" for the instructions. I didn’t think the instructions were as good as those in other books, but it’s a good book overall.

I purchased this book to help me prepare for my first ever soap making experience. I didn’t actually use a recipe from it for my first soap as I used a recipe from a friend. I will be using the book for my second batch today. However, the book absolutely covered everything I needed to do to successfully and safely make soap! I highly recommend purchasing this book!

This is definitely a GREAT book for a beginner like me! I was really happy to get all of the info that I did and will use this book for a long time!

Honestly, I am a little disappointed in this. Lots of great info but also lots missing. There are better books out there for the price.

So much information.. great for a beginner in CP soap making. I have learned so much from this and am very excited to start making my soap.

more recipes then the other books. hope to try different ones this week
