Customer Reviews

Circus In The Sky is a beautifully illustrated book of the constellations told in a poetic style, through the eyes of a little boy who believes he is the ring master of the night sky. Circus In The Sky is so magical it will inspire parents and kids to want to learn more of the sky and it’s wonders.

Nancy Guettier is an emerging author of Children’s books. She is also the Sr. Vice President for Potterybarn kids and teen where she has worked for 12 years creating Dream Rooms for her customers. Working in the Kids industry for over 20 years Nancy wanted to use her creative skills to

educated kids through her whimsical stories. Nancy is also the mother of three beautiful children who inspire her to write and share her stories with kids everywhere.

Beautifully illustrated. I bought this mainly to decorate the bookshelf in my baby's circus themed room. I like the texture of the cover. Almost rubbery feeling.

I got this children's book sent to me by the publisher in exchange for an honest reviewThis a great bedtime story. My children love it. It is about a little boy named Julian who cannot sleep. He pretends to sleep so his father leaves. Once the coast is clear he looks up at his star and cloud stickers on his wall/ceiling. He will then drift off to sleep and dream about him running a circus in the sky!Their are dancing girls, twins of tight ropes and even a roaring lion! missed the show?! don't worry it will be on again tonight when you sleep!

The book is a learning and yet fun book. The colorful illustrations will keep your little ones' attention. They won't get bored. The book teaches about the stars and there are even pages showing descriptions of the different constellations. Another thing I liked about the book was the large print, making it easy for the little ones to read. Another wonderful children's book from author, Nancy Guettier.I received a complimentary copy of CIRCUS IN THE SKY from the author, Nancy Guettier for my unbiased view. No other compensation took place.

This is a wonderful way to entice the youngest child to look up at the sky and teach them about the constellations. I received a copy to facilitate my review. The opinions expressed here are my own.

Imaginative book that looks at the stars and spins tales about the constellations. There is something classic and forever memorable about a parent teaching a child to "read" the night time sky. Nancy Guettier gets the story just right.
