Grade Level: 4 and up

Customer Reviews

With 320 full-color pages, Reading & Math Jumbo Workbook: Grade K provides additional activities on alphabet, sight words, handwriting, phonics, numbers, shapes, and other topics necessary for kindergarten-level reading and math. Although some of the pages were a bit challenging, I like the variety offered by the workbook. The different sections provided many exercises that I had not seen in any other kindergarten reading or math workbook. I also appreciated the sections on test taking because my daughter needs to learn the skill for the future.

We are homeschooling. My now five year old completed the pre k book and now has moved on to the kindergarten book. We love the flash cards you can cut out. He enjoys the work. My younger son is just starting his big book and is also enjoying it.

my child really likes these pages. these pages are exactly like what they see in school so i would

recommend this to any parent. we usually get the Kumon workbooks but like these just as well. i would definetly recommend to my friends and will buy in the future.

This book is a little bit challenging in spots for a child just beginning kindergarten but it introduces key concepts like differentiating between vowels and consonants, telling time, and counting money. Itd be a good book to refresh your childs memory the summer before first grade.

My son (who is 5) loves this. It's very educational and appropriate for what he is learning in school now. This is the 2nd in the series that I have purchased. It came quick as expected and in a box to ensure no damage done.

My son's school recommended this book. He has been using it for almost a month now. He really had fun using the book, especially for the math portion since he is very good at it. He loves the cutting and gluing of items too. I like the English part, it gave me a good foundation to follow since we speak a different language at home. Overall, it is a very good book and I'd recommend it to anyone.

This is a great book to help your child with school. My kids love it and always want to do more. The key to learning is making it fun!

Rich with a variety of subjects on the 4th grade level. Perfect to supplement what my son is learning in 3rd grade. Also has a sneak peek of 5th grade assignments.
