Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

Rosie Harlow is a contributor for Kingfisher titles including: 'Energy and Power','Nature in Danger','The Environment'

This has been one of my 6 year old grandson's favorite books. Friendly, non-preachy writing; illustrations clear and realistic. Not only does he learn about recycling, he also learns other processes: from timber to logs to paper making; from rainfall to reservoirs to faucet water to evaporation to rainfall; and his fave, nature's recycling and natural composting. The DIY projects are a bit beyond him, but when he gets a little older we will try some of them. Because of this book, he enticed us to take him to the local recycling center, which was a field trip I wouldn't have thought of

and we all enjoyed it. This book, appropriate for pre-K through elementary school, helps raise awareness constructively and gently.

I am using this book in my class and know that it will be an asset to my students.
