Synopsis

This workbook contains 100 multiplication facts worksheets. Each worksheet has 35 exercises. The first 20 worksheets focus on a single number's multiplication facts, which is good for beginning students. Worksheets 21-30 have the facts 1-10 mixed. Worksheets 31-50 have the facts 2-10 mixed (the 0's and 1's are now removed). Worksheets 51-100 are like worksheets 1-50 except that the numbers 11-12 are included. Each worksheet has designated room at the top for students to write their names and for teachers or parents to record the score and time. All of the exercises are numbered for easy reference. All of the answers are tabulated in the back of the book, also with numbers so that teachers or parents can easily check the solutions. The exercises are written with a size 14 font. The copyright notice allows teachers and parents who purchase this book to reproduce selected worksheets for their own students and children.

Book Information

Paperback: 126 pages
Publisher: CreateSpace Independent Publishing Platform (December 27, 2011)
Language: English
ISBN-10: 1468138219

Customer Reviews

My son was struggling with his multiplication facts and timing. This book has 100 pages with 35 problems on each page and a space for keeping track of time. My son was assigned two pages a day and his facts and timing has improved greatly.

Great book to help with math facts...my only complaint is that the pages are not perforated.

My daughter is in 2nd grade and this book is helping so much, I highly recommend it for home use or if someone is homeschooling. I just love it

multiplication book with lots of practice pages. It is useful and worth the money to save from printing out sheets on your printer.

This book is an awesome addition to my resources! It will be awesome to help my students learn their multiplications. One thing I do advice is that it does not include multiplication by zeros all on their own. They are included with others though. Some students do have trouble understanding that zero multiplied by any number is still zero. Other than that, it's everything I needed. :D

Great for reviewing math facts. Not sure my kids are so appreciative, but they finish their page-a-day quickly and move on.

Just what I wanted for my 1st grader. These are excellent for homeschoolers or any parent who wants their child to get some extra practice.

Great for learning the facts!!
