Cervantes is a world-renown expert on indoor, outdoor, and greenhouse cannabis cultivation. He puts more than thirty years of expert cannabis growing knowledge and hands-on experience at your fingertips with his books, articles, and photographs. His expert advice has guided millions of

growers worldwide to apply simple, effective horticultural techniques to high-yield closet, basement, backyard, medicinal, and guerilla gardens. In his monthly question and answer column, Jorge's Rx, in High Times, the flagship of the magazine's cultivation section, Cervantes solves growers' problems with definitive clarity. He also pens a regular column in Soft Secrets. The magazines boast the biggest circulation in North America and Europe respectively. Cervantes still finds the time to contribute feature cultivation articles to High Times, Burst High (Japanese) and a dozen European cannabis magazines. Multilingual Cervantes also speaks at eight international cannabis fairs in Europe every year. With five books in print and more than a half million books sold, you can find his work in Dutch, English, French, German, and Spanish.

Pretty interesting and has all the details and steps for the basics and advanced. I learned quite a few things I thought I already knew but he knows more. next one I want to purchase is extractions and edibles. And he also has a new one out this year supposed to be very advanced

What was disappointing to me was that this "condensed" version only covered indoor gardening. I wish I had known that before making the purchase. Otherwise, it is what is says it is "pictures with a lot of good information."

Very knowledgeable and written in an understandable and ordered manner. Highly recommend

A good starting point.

I ordered the wrong book but regardless this was enlightening and a great read that informs you in every possible area of growing cannibas. The author left nothing out, so if you are contemplating growing cannibas this books for you.

This is another great book book by Jorge. It's a short but good read with all the needed info in an easy to find layout. It has all you need to know to grow your own medicine and easier to navigate than Jorge's Marijuana Horticulture. The info overlaps in these two books by design, with grow basics being just what the title says, along with updated material. If you want a great book to get started, you will not be disappointed with this one. I'd suggest buy this one first and then get the Marijuana Horticulture at a later date, as it has 512 pages to keep you busy while you grow.

Very in depth book On Cannabis Growth, walks you through every step of the way and basically grows your marijuana for you, without actually growing it. Gives the essentials you need to know and what works and what has been tested and tried and true. It is a alot of information to handle so once read I would reread and go over certain points to make sure they stick! Also take your own notes while reading, grab a clipboard and pen and paper, and write down imporatant, useful information that you just learned and review it once you are done with your read. Can't wait to purchase Marijuana Horticulture: the indoor/outdoor grower's Bible.

After reading Ed's book twice (rocket science) I decided I better get more info from another reliable industry name. I got it right here and am just getting into it. Highly recommended..
