Love this book! Concepts are introduced in perfect order and the skill building week/practice work is very helpful. I used the workbook 1 and 2 to practice on my mind math and I loved it. Perfectly organized and it was very easy for me to build my skills. My child is having fun with this. I think the shapes puzzle is interesting. Wish they had more of these. It is nice to have an answer key, but I feel it should have been in the Instruction book.

This is the second in a series of workbooks for the SAI Speed Math Academy's Abacus Mind Math Course. It provides 10 additional weeks of daily math practice problems and mental exercises.All of their books are well written, nicely illustrated, easy to read, understand and follow. They make learning easy and fun.This is a workbook for daily exercise and practice. The Instruction Book covers the "how to do it" part of the course.All of these SAI books are well worth the price paid. Highly recommended.

Bought for teacher to use with her Chinese cultural classes. They like the simplicity of the approach and ease of use.

It is very nice book!

These books are a gem. Provides lots of practice. There is Answer Key which is a great help for a parent.

Clear and easy to understand. Great product and learning tool!

This book is useless for an adult to learn soroban.It contains hundreds and hundreds of exercises without any explanation.

I suppose it is fine for what it is. The description though did not indicate the low level of these books. You never get past addition and subtraction, even in volume 2. Not what I was looking for.
