Synopsis

This high-quality laboratory manual may accompany any comparative anatomy text, but correlates directly to Kardong's Vertebrates: Comparative Anatomy, Function, Evolution text. This lab manual carefully guides students through dissections and is richly illustrated. First and foremost, the basic animal architecture is presented in a clear and concise manner. Throughout the dissections, the authors pause strategically to bring the students' attention to the significance of the material they have just covered.

Customer Reviews

Ed Zalisko is a professor in the biology department at Blackburn College, Carlinville, IL. He received his Ph.D. in zoology from Washington State University and an MA and BA in zoology from Southern Illinois University, Carbondale, IL. He has taught courses in comparative anatomy, human anatomy and physiology, developmental biology, cell biology, zoology, and human reproductive biology.Ken Kardong is a professor in the zoology department at Washington State University, Pullman, WA. Ã Â He received his Ph.D. from the University of Illinois and his MS and BA from the University of Washington. Ã Â In addition to teaching comparative anatomy and evolution, Ken is also involved in developing software programs for use in the laboratory sections of these courses.Ã Â

Good buy. The book was in excellent condition, given that it was used. Some highlighted areas, but it was expected. Great buy for all you comparative vertebrate students!

Very helpful in class. Make sure this is the correct book you need an try to buy it used if possible!

This wood be a better book with color images for comparison.

Makes a very dense subject easier to understand.

Great quality, quick delivery

Product as promised

new

Came as seen in pic and good condition!
