## Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

The map is fabulous, but the tube it came in was retaped up like it had been returned and the map itself was crinkled on one edge where someone tried to put it back in the tube. Otherwise, it is a nice map.

OK map for small classroom. Our classroom did not have an Italian map so I got this. Works ok but you have to be close to it, obviously. A bigger map would have been a lot better. Also - for an Italian class, it might be better to get one with the regions identified. I plan to bring it home at the end of the semester and hang it up. It should be more than adequate for that use.

My wife and I love Italy, so I bought this map to put on the wall. Like all National Geographic maps this one is clear, concise, and large enough to see major cities and larger towns in Italy. The map comes rolled in a tube and I mounted it on a piece of foam core so we could put it on the wall of our kitchen.

Of the Italian maps I purchased (3), this is my favorite, and will definitely be hung on my wall, after mounting.

exactly what I was seeking. I am working with a WWII veteran to review where he flew during his glory days. This map will help us locate the cities and airways where he traveled. We needed something larger than the typical atlas and this exactly fits our needs.

The map is beautiful. The outer package & tube were delivered in fine condition. However, the map indide is completely wrinkled and damaged.Disappointing.

Framed and love it

Great Product
