Synopsis

The Medical Marijuana Guide. NATURES PHARMACY is the new science, the new healthcare model based on the bodies ability to regenerate itself. Marijuana provides all the elements the body needs to heal itself. This is ancient wisdom but science has proof that detoxification and whole plant medicine can heal ninety-seven percent of all diseases. Fresh raw marijuana is a complete food source, an essential source of minerals that restores physiological balance. Take healthcare into your own hands. Learn how to prepare cannabis based medications, extractions and infusions. Learn how to make cannabis infused creams, lotions and balms plus much more. Discover the many health benefits from consuming marijuana as a medicine and as a complete food source. This guide helps the patient take healthcare into their own hands and this guide also helps the practitioner provide effective quality treatments. Discover the endocannabinoid system and how cannabinoids found in marijuana work to regenerate the body and stimulate neurogenesis. Take healthcare into your own hands, educate before you medicate. I am a licensed medical marijuana producer, licensed under the MMAR program, issued by Health Canada. Peace And Prosperity For All. Chef Derek Butt.

As a patient I have learned a great deal from from Chef B’s new book. It bypasses all the stereotypical stoner cliches’ and approaches the subject matter with the seriousness and respect those using cannabis for medicinal reasons deserve. The book contains historical, scientific and culinary information that may be unknown to those who have inadvertently found themselves ill and in need of pre-western plant based medication. The recipes are a delightful supplement to Derek’s

YouTube cooking show. Don’t think you’re only getting the played out pot brownie but rather there is a pantheon of varied foods for those who must medicate often and do not wish to have a one note diet. What impressed me most was the subject of juicing non-psychoactive / non-decarboxylized cannabis leaves for continued health maintenance. As a long term patient I was surprised to find out something I was completely unfamiliar with. Pros and neophytes alike will enjoy Nature’s Pharmacy.

(Clix Hemp from youtube) -if you can get past the many spelling errors and the grammar mistakes this book is pretty awesome. What I respected most about it is how it listed cannabis as a possible treatment for "premenstrual syndrome". When looking around in the cannabis community there is very little discussion about woman, their periods, and medical cannabis as a treatment. Mostly because when looking for a treatment for pain relief or an ease of mood swings women are only recommend strictly on hormonal treatments and later on if worsened, surgery. Even though the description was brief it had said more than enough. This book gave me a lot of information on natural remedies for the use of the raw plant as oppose to just getting high. It opens up options rather than just trending and I really liked that about it. It was a great purchase and a great read overall. It opened up my eyes to new possibilities and even a bit of hope for future treatment.

This book has helped me throughout my culinary endeavor, from the making of salves and topicals to juicing fresh marijuana leaves, which is the very most efficient way to utilize marijuana for medical use answering your question from YouTube. I’ve been experimenting with hemp milk and I have also successfully made canna flour to make the lovely scones I serve my guests at the bed & breakfast I work at in amazing Washington State. I am eagerly looking forward for your next book to come out, good growing! I will also leave a more short and sweet comment on your Youtube page.

This is a Kindle book ordered through . It covers some medical issues that have been known to improve with the use of marijuana. This tiny book explains the health benefits and the applications for use. Chef goes through the preparation of material and application through a variety of recipes from smoothies to salves. Its a fascinating read (for all you cookbook lovers). There is something for everyone. The uses for marijuana in the medical field aren’t even the tip of the iceburg. Don’t let past misinformation steer you away from an herb that may help you fight your present medical condition. Be very informed. We are on the cusp of knowing just how much this plant can help us with no dangerous side effects.

Hello! (i’m farschfuhrer on youtoube)I am really happy because of obtaining this book. Unfortunately, in my country we don’t have books on this subject. It not only gives us knowledge how to use cannabis for cooking (many useful recepies, some of them I’ve already tested) but already tells us about possibilities of cannabis products in treating cancer! It is also very important for me to get the ability to know all that new things about taking cannabis. Thank you so much Chef Derek for your work!

Excellent source of information, far more information than I had expected. Definitely a good resource for anyone who’d like to educate themselves about marijuana, it’s uses, and various ways of utilization. Very easy reading, with pictures of fantastic plants, and work cited in the back, so you know where the information came from.

Hey this is namelessglover on youtube bought the book a while ago and all the information in there has helped me on my path to learning more about cannabis and all the benefits it can give to us. I especially liked learning about the temperatures that THC CBD CBN breakdown at for decarboxylization.

I love the author - I have studied him for a few years now. The book itself is poorly assembled. It was falling apart at the binding - the pages were falling out the very FIRST TIME I read the book. So bad that I turned RIGHT around and bought the e-book.That’s how much I love the author. But the book itself...see the pics
