Ms. Loren has said that everything she is she owes to pasta, but you canÃ¢â ¬â„¢t help wondering as you pass clusters of beautiful women if it isnÃ¢â ¬â„¢t something in the water as well. Whatever it is, spend enough time here and itÃ¢â ¬â„¢s bound to rub off on you.Perhaps itÃ¢â ¬â„¢s the passion that seems to flow through everything you see and do in this gorgeous setting on the bay. At a restaurant, order a plate of spaghetti vongole with tender little clams from the bay and the waiter congratulates you as if youÃ¢â ¬â„¢ve just won the lottery (you may as well have itÃ¢â ¬â„¢s delicious!). Explore the tiny streets of the Spaccanaploi and hear a cacophony of exuberant conversations complete with enough hand gestures to qualify as aerobic activity. Wander thru the ruins of Pompeii and see the public declaration of sensual delights in the form of provocative mosaics and statuary. Cool, calm and collected is not Naples fiery, flamboyant and alive is more like it.Our STREETWISEÃ Â® Naples Italy Map enables you to be part of the passion. Explore the heart of the city thru winding streets past historic churches, open markets spilling with fruits and vegetables and the ubiquitous cafes. Every Italian city seems to have a least one CafÃƒÂ© des Sports Naples has several - where the debates about soccer reach UN proportions. The Museo Archeologico Nazionale houses the restored treasures from Pompeii including mosaics of astonishing detail and finesse alongside the famous Farnese Bull, sculpted in the 3rd century BC. The inset map of the Naples area will provide the information you need to drive into or out of the city, whether itÃ¢â ¬â„¢s to the airport or venturing further south.Out of Naples, you can drive to the ruins of Herculaneum or Pompeii, and afterward continue on to the Sorrento peninsula. This is possibly the most romantic place on earth. Word of warning: choose your traveling companion carefully because you will fall in love itÃ¢â ¬â„¢s that romantic! The hill-shaded map of the Amalfi Coast depicts all the twists and turns of this beautiful 50 kilometer stretch of mountainous coastline situated between Sorrento and Salerno. The coastline is dotted with small picturesque villages like Amalfi, Ravello, and Positano which are stacked precariously on steep cliffs above the Gulf of Salerno.The famous Island of Capri is nearby, possessing jaw dropping beauty. Day trips to Capri can be a bit trying with the crush of tourists packed into the Piazza Umberto I, and boats lined up like planes at LaGuardia waiting to get

into the Blue Grotto, but if youÃ¢â ¬â„¢re lucky enough to stay overnight youÃ¢â ¬â„¢ll witness the transformation of the island once the ferries carry away the last day tripper. A quiet descends and the island truly becomes a magical paradise suspended in time. Experience this once and you will dream about it forever.Our pocket size map of Naples is laminated for durability and accordion folding for effortless use. 'Don't leave home without STREETWISE.' --The New York Times'STREETWISE is an absolute travel essential.' --Travel + Leisure Magazine'In a strange city, your sense of direction is only as good as the map in your hands. The best maps to carry are published by STREETWISE.' --Chicago Daily Herald

STREETWISEÃ Â® is the first map to be designed with modern graphics and is the originator of the laminated, accordion-fold map format. WeÃ¢â ¬â„¢ve set the standard that every map company has imitated but never duplicated. Our mission is to make you feel comfortable, to make you feel safe in a place where youÃ¢â ¬â„¢ve never been before and to enable you to experience a familiar place more fully.The company was founded in 1984 by Michael Brown, who had been in international publishing for many years, setting up subsidiaries for textbook publishers. In the

1970Ã¢â ¬â„¢s, Brown traveled extensively throughout Africa, India, the Middle East and Southeast Asia. Brown would take a large paper map, cut out the city center, folded it up and slip it into his pocket, thus preventing him from looking like a tourist in areas where discretion is the better part of travel. This was his tool for surviving.After many years on the road, Brown settled back in New York and decided to start his own business, based on the adaptations he had made to maps in his travels. His goal was to give someone the ability to navigate easily in unfamiliar terrain.He started with a new map format: the accordion fold. Such a simple idea, but at the time it was revolutionary. No more struggling to fold an awkward, oversized paper map. This new format would enable the user to blend in like a native, instead of stick out like a tourist. Brown then added lamination to ensure that the map would be a lasting tool.More important than the format was the design of the map itself. It had to be a map that not only succeeded above and beyond any map he had used, but was esthetically appealing as well. The look of it had to be as striking as the functionality. Color was introduced in a way that was never seen before in a map - vivid purple for water, soothing gray for the background of street grids, gold to highlight elements of the map. Clarity, conciseness and convenience in a very stylish package.Building the business was a 24 hour job. Brown sold the maps during the day, zipping around Manhattan making deliveries on his Harley Davidson. At night he packed the orders and did the design work. More titles were added, each title requiring months of research and design.Today, STREETWISEÃ Â® produces over 130 titles for major destinations, regions and countries throughout the United States, Canada, Mexico, Australia, Europe, the United Kingdom and Asia. We have grown from the back of a motorcycle to selling millions of maps around the world.Yet each title is still painstakingly researched and updated. STREETWISEÃ Â® is one of the only, if not THE only map company that conducts research by walking or driving an area to ensure accuracy. After all, what good is the map if what you hold in your hands doesnÃ¢â ¬â„¢t match what you see on the street sign? This lengthy fact checking results in superior accuracy; in effect, weÃ¢â ¬â„¢ve done the work, now you have the adventure.In the end, itÃ¢â ¬â„¢s not about the map, itÃ¢â ¬â„¢s about getting out and finding your own authentic experience wherever you go. ItÃ¢â ¬â„¢s about being in a city or a region and discovering things that you never thought you would find. You can do this if you have confidence and you have confidence if you have a great map. STREETWISEÃ Â® is the great map that you need.

This is a nice compact durable map that fits conveniently into a large pocket. In theory it is the perfect companion to touring Lisbon by foot, tram and subway. Given that this is exactly how I used it, I have to report that the 2012 edition turned up to be deficient in two remarkable instances which

(for me at least) calls its overall reliability into question. First, the 2012 edition doesn't show the Red Line subway going to the airport. At first blush, this is understandable since the airport subway station only opened in July 2012. However, the map includes a legend for subway lines under construction (a broken red line) but doesn't even show that the line to airport was under construction. Given that subway construction is measured in years and not months, this is a pretty big omission. Second, on the blow-up map the red line between Alameda and Sao Sebastio is simply omitted (while on the less detailed map this section of the line is shown). Lisbon isn't Tokyo--there are only four subway lines in Lisbon and these sorts of omissions can only be attributed to careless and sloppy editing. Not a good sign at all.

This is a very useful, laminated map that helps you get around the labyrinth of streets in the center of Naples. This map also includes smaller maps of Pompeii and Sorrento, and a larger map of the bay of Naples and the Amalfi coast. I would not have been able to see as much as I did, as easily as I did during my five days in Naples if I hadn't had this map. I believe, however, that the map needs to be updated: several stops on the subway lines, especially Linea 1, are not indicated on the map (e.g. Toledo and Municipio); furthermore, the map gives the impression that this subway line ends at Universita' when instead it continues to Piazza Garibaldi, where the main train station and bus terminals are located. Since the easiest way to get around Naples is on the subway lines, it would be helpful if all the stops were included on the map.

This map tries to cover too much of the region and ends up being pretty much useless for any of them. I've always bought and loved Streetwise maps before (for Rome, Venice, London and other cities) so I thought I would feel the same about this one--not so. It's poorly laid out, as others have mentioned, meaning you're constantly flipping from one panel to the next trying to figure out where you are. There's also not nearly enough detail say in the historic center to make it handy for navigating around small streets and finding things. I ended up tearing out a much better street map from one of my guidebooks and using that far more often. All in all a disappointment; I left it behind at my B&B hoping that maybe someone else in the future will get better use from it.

This is just as excellent as the Paris Streetwise Map. It folds to 9" X 4" and uses every available space on back and front as it expands to 9" X 36".On one side 2 panels are devoted to a street directory Two panels show the Naples Area, giving the placement of the airport, harbor, train station and major highways in an overview. Five panels show the Centro Storica of Naples with major

churches and museums shown and amazingly detailed street names very clearly printed.On the reverse, four panels are devoted to the harbor area. Two have insets of Sorrento and Pompeii with major streets and sites.3 panels show a topographical view of the Gulf of Naples, Amalfi Coast, and Gulf of Salerno, as far as Avelino on the north, almost to Paestum on the south. I am a map lover and this is a very satisfying map to give one one's bearings. Only wish it had insets for Positano and Amalfi. Sturdy and compact.

I have always used the Streetwise maps for our families' vacations, but have to say that their map of Lisbon, Portugal is horrible. Even at the top of the index it states that "all sites and streets aren't indicated". This indicates to me that as a map it is incomplete; and that this is. To find one of the biggest monuments in Lisbon, the Rua Augusto Arch, there was no information in the index at all. I was able to find the Rua Augusto, and the map showed a series of buildings at one end but never mentioned that one of these was the Arch. Ridiculous!!!!!!! I have been using a tourist map ever since. DO NOT PURCHASE "THIS" map!!!!!!! (Other maps I have used from Streetwise we're: Rome; London; Paris, and Madrid and highly recommend them... Not Lisbon.

I think Streetwise Maps live up to the old saying, "don't leave home without it". You can carry all the electronic devices with maps downloaded and there is still nothing like a slim as paper, laminated map to tuck in a cargo pants pocket. A paper map never loses its charge. It gives you the primary attractions, hotels, the streets and public transportation locations. I use these maps for whatever major city I visit. They hold up to pouring rain and never break on the folds. The print is also large enough to read easily.

I like Streetwise maps, but not this one. It's rather a set of maps: Naples, Sorrento, Pompeii the Amalfi Coast. So if you want to see where in Italy the city of Naples is, this map is for you. If you want to have a map of Naples with metro stops and tram line - buy something else. This one is useless to take for a walk in Naples.

Yes!! Good for the 'on foot' tourist and also the "motorized" one!
