Tammy Enz became a civil engineer because of her awe of the massive steel bridges that spanned the Mississippi River. She just had to figure out how they worked. Today, she still likes tinkering and figuring out how things work. When she isn’t tinkering, she fixes up old houses and conducts experiments in her garden and kitchen. Most of all, she loves reading books about anything and everything and asking ’why?’Agnieszka Biskup is a science writer and editor based in Chicago. She is a former editor for the science section of the Boston Globe as well as the children’s science magazine Muse. In addition to children’s books, she has also written many articles for newspapers, magazines, and websites. Her books have received awards from Learning magazine, the Association of Educational Publishers, and the Society of School Librarians International. Her book Football: How It Works (Capstone Press, 2010) was a Junior Library Guild selection.

Gave this to my 9-year-old son for Christmas, and he has really enjoyed reading it. This book is a

great deal, because it is a compilation of 4 books: "Batsuits and Capes", "Batarangs and Grapnels", "Batmobiles and Batcycles", and "Batplanes and Batcopters".

The writer makes this book come to life for my kids. Who knew science and engineering skills could be this fun and applicable! This is a MUST HAVE book in your home library! We own all the books this author has written and they are never a disappointment!

My 7-year-old son’s reaction to the book - he loves it and keeps telling us it’s awesome! It is full of fascinating information that relates stuff from Batman to actual technology. I enjoy it, my husband enjoys it, and our son keeps spouting out new info from it. It’s a well-made book, great for many ages.

Super interesting! My son and I both really like it and can’t wait to get the series!

This is actually a really great book but the binding completely fell apart in the first 3 days of use in my classroom.

I bought this for a 9 year old boy who liked the book, but it is likely best read and discussed by an adult with this age. It’s a great book for children who are interested in super heroes and science.

Great science based book! It is a combination of all of the small books .

My son just spent the morning enjoying this book.
