Customer Reviews

Detailed, topographic & waterproof map of the Absaroka-Beartooth Wilderness in Montana/Wyoming.

Outstanding map of Absaroka/Beartooth Wilderness and surround National Forest! Waterproof and strong.

This is an excellent map. As a person who lives on the edge of the Beartooths and a frequent hiker, this map is a must have. We have purchased three of them so far. One is always in the backpack.

This map and the Absaroka-Beartooth Wilderness Hiking Guide by Bill Schneider are all you need to do some easy day hikes in that area. If you plan on doing overnight backpacking rather than easy day hikes, you will need more detailed topo maps and perhaps a different hiking guide.

Great map. Waterproof and all applicable trails included.

This map is exactly what I was looking for. The details are great and having the mileage listed is

very helpful. This combined with my Falcon Guide are perfect resources for our hiking adventure in the Beathooths.

I own more than a dozen Beartooth Publishing maps and they are all great. The trails are shown in color, making the maps much easier to read than the official National Forest Service maps. Each map has descriptions of several trails that include mileage and total elevation gain. When a trails has ups and downs, knowing the total elevation gain is much more helpful in assessing difficulty than just the net elevation gain.Another very important feature of Beartooth Publishing maps is that the trails that are closed to motorized vehicles or bicycles or horses are marked as such. This is important because US National Forests are open to a very wide variety of uses.The maps have contour lines, shaded relief and are printed on waterproof paper.
