Synopsis

The Nurse Educator’s Guide to Assessing Learning Outcomes, Third Edition is a widely-used resource for both faculty and nursing education students that covers the assessment of critical thinking, the development of learning objectives, and the creation of tests, including detailed tips for writing many kinds of individual test items. The book also covers the analysis of test reliability. Examples of effective and ineffective test items are included throughout to help faculty and nurse educators deepen their understanding of how to create effective tests and assess student learning. This new edition addresses the increased pressure that NCLEX and other certification exams are placing on nursing students and faculty, and reflects the most recent updates to the NCLEX Detailed Test Plan. Each chapter has been updated with timely information and examples.

Customer Reviews

Helps me with better evaluations than multiple guess quizzes.

I was required to purchase this as a requirement for my MSN in Nursing Ed. I enjoyed this textbook and will keep it as a resource for later in my career. Very helpful, especially for analyzing exams.

This is what the title states- a guide to outcome formulation and assessment for nursing educators. This resource is well organized, gives specifics, and clear guidance. I appreciate this timely resource for the work our program is currently engaged in.

i purchased the ebook as I am a nurse educator and want to increase my knowledge about curriculum. This book is very well written, summarizes everything I need to know and is easy to comprehend. I appreciate the guidance and plan to share it with other faculty.

This is a great resource. It is really helping me to understand concepts with real examples. I am glad I purchased it.

Really opened my eyes to nursing in the education field, a must have for anyone wanting their MSN

Found as expected.

Excellent resource! I know that I will be coming back to it again and again. As an educator it will soon become a staple in my Library.
