Diana Garza received her Bachelor of Science degree in Biology from Vanderbilt University in Nashville, TN, followed by an additional year to complete her Medical Technology requirements at Vanderbilt University Medical Center. Her interest in laboratory sciences and in teaching led her to earn a Masters in Science Education at the Peabody School of Vanderbilt University. She worked at Vanderbilt Medical Center in the Microbiology Department while a graduate student. A move back to her home state of Texas led her to a collaborative graduate program with Baylor College of Medicine at the University of Houston, and resulted in her Doctorate of Education in Allied Health Education and Administration, all the while she worked in the Microbiology Laboratory at the University of Texas M.D. Anderson Cancer Center (MDACC).Ã Â Her laboratory and teaching experience continued at the University of Texas Health Science Center at Houston and for many years at MDACC, where she later became the Administrative Director of the Division of Laboratory Medicine. While in Houston, Drs Garza and Becan-McBride were involved in numerous courses for technologists, nurses, and physicians to teach phlebotomy techniques. As young faculty members, they began to develop curriculum materials for their own use and in 1984, collaborated in publishing one of the first comprehensive textbooks focused solely on phlebotomy pracitices. Their successful coauthoring partnership has endured for over 2 decades. In 1990, Dr Garza joined the faculty of Texas WomanÃ¢â ¬â„¢s University-Houston Center, where she taught internet-based quality improvement courses and became editor of several journals and continuing education publications. She has taught extensively, been a reviewer/inspector in many regulatory processes, participated in accreditation procedures, and authored, edited, and published numerous manuscripts in the field of phlebotomy, health care, and quality management. She currently sits on numerous health care advisory boards, nationwide committees, consults with companies and organizations, and continues her writing and editorial pursuits, mostly in the field of phlebotomy.

I got this book to start reding before my class and i couldnt pass up the price! Its used and has some water damage and something's you should expect with a used book (highlighted and notes taken) i dont mind though also i got an email the place i bought it from is a charity and helps people so to me this is a double win!!

I used the 8th edition so I know for a fact how good is this hanbook!!! The 9th edition has everything the 8th edition, plus new updates and a new way of showing the information for people like me stufying Phlebotomy, Medical Lab Technicians and more!!! It's awesome!!!

Just a couple highlights side notes....helps guide me, no complaint. Also one page ripped out at the end of the book. Besides that great book, perfect for class.

great

Fast shipping I like it...

I love it!! It came before I expected. Little writing inside and damage.

It was clean.

I ordered this book for a friend and it came in very handy for her. Sorry for the late review
