Customer Reviews

This is not a book for scholars of Islam, those looking to delve deeply into the theology of this belief, rather it is a primer for the basic tenants of the faith. Well written and openly critical of some of the modern interpretations of this faith it was a refreshing read. I have recommended this book to many people who have also found it a great way to get handle on the beliefs that drive this growing religion that is often in the news.

Mr. Sardar did the Blogging of the Quran for Guardian that was very impressive. His book is giving me food for my research. His knowledge of Islam is vast and he communicates his ideas very clearly.
