## Synopsis

This book introduces the reader to a new generation of aeroplane that features cockpit automation: the collection of computers and displays that have taken the place of the traditional flight instruments, navigation, and control systems found in older-generation aircraft.It provides basic common-sense instruction in the use of cockpit automation equipment now available on smaller propeller aircraft. The entire use of cockpit automation is covered as it happens in an actual flight, from preflight, taxi-out, take-off, cruise, descent and landing.

## Book Information

Paperback: 188 pages

Publisher: Iowa State Press; Pap/DVD edition (January 2002)

## Customer Reviews

Stephen M. Casner is a research scientist at the NASA Ames Research Center. He holds an airline transport pilot certificate with type ratings in the Boeing 737 and Cessna Citation and is a Gold Seal certified flight instructor. He lives in San Francisco.Ã Â Douglas A. Dupuie is a first officer with Canadair Regional Jet and a Gold Seal certified flight instructor. --This text refers to an alternate Paperback edition.

It was for school...

A great learning guide to the Garmin 430 and Bendix/King GPS units. Recommended for any instrument students who will be using these avionics packages.
