Customer Reviews

The out-of-print Boulder Climbs North and Boulder Climbs South have been revamped and republished as three separate volumes. This is the first of the three, covering all trad and sport crags in the canyon. Former park ranger Richard Rossiter is a master when it comes to maps and topos, and his detailed, accurate route descriptions make this book essential for anyone intending to climb in Boulder. Includes favorites such as Castle Rock, Elephant Buttresses, Cobb Rock and the new Upper Dream Canyon area. Ice climbs are also featured.

This guide looked really good when I first got it. But when we went on our trip and drove through boulder canyon, it was very hard to find out where in the guide we were and what climbs were around that area. There are simply not enough photos of the routes. Alot of drawings that are very hard to follow. If it wasn’t for the mile by mile crag listing on Mountain Project.com, this guide would have been completely useless. I regret buying it. There must be a better one out there.
