My 7 year old loves dinosaurs so when I saw this book it was a must buy. He loved the book, it is easy enough for a kindergartner or 1st grader to read but also includes fun facts so my older kids equally enjoyed the book! I am a big fan of all the National Geographic kids book, I highly recommend for parents of kids that want to learn about animals.

I bought several of this books for my children, they love them so much that they have now a big collection, and I love the fact that they actually read them and are learning a lot, they come with different reading levels for each child reading skills.
