K-Gr 3Ã¢â ¬â •Overflowing with fascinating detail about dinosaurs and the Mesozoic era, this new addition to this series will entertain as well as inform. Playful, cartoon illustrations complement the writing, although there are some text-heavy pages. The information flows well; for instance, one spread depicts whimsical little animals digging for fossils, followed by pages of paneled illustrations explaining the process of how fossils are created. The use of comparisons and contrasts will help kids easily absorb material. The back matter contains a page of "More Fun Facts," which will encourage children to discover additional knowledge. The book lacks a glossary and index, and a definition of the term theropod is incomplete. However, these slight flaws won't detract from kids'

overall enjoyment. VERDICT A delightful addition to science collections.Ã¢â ¬â •Melissa Smith, Royal Oak Public Library, MI --This text refers to the Unknown Binding edition.

Any child (or adult for that matter) who is fascinated by dinosaurs will adore this little paperback crammed with fun facts about these prehistoric creatures. Not only will you have fun dazzling your buddies with this esoteric knowledge but who knows; it may come in handy some time if you are ever a contestant on "Jeopardy!" The colorful, humorous cartoon illustrations only make a good book even better. Don’t miss out...get a copy of this book now so you won’t be the last one in the neighborhood to know that Tyrannosaurus Rex could gobble up 500 pounds of meat in a single bite. That would be about 2,000 hamburgers at a decent restaurant (probably 4,000 at a fast food place!!).
