Excellent workbooks.

My seven year old daughters loves this book!

My 7 yrs old daughter love it

i love the school zone products. i use them all the time to supplement work during the school year and as summer review so my son won't forget the skills he learned during the year. excellent product.

I bought this workbook for my eldest son a few years ago and it was a really great workbook that covered lots of topics in a clear and interesting way. So when my youngest son needed a math workbook, it was a no-brainer. I'm still very pleased with it.

This is to supplement my daughter's schoolwork because her kindergarten assigned book is not challenging enough. I like that the types of math exercises alternate throughout the book, so not all of the charts are lumped together or the mazes or the connect-the-dots. I had a difficult time finding a math workbook that looked "fun". This one has puzzles, mazes, connect-the-dots, coloring pages, along with the traditional fill-in-the-blank math problems. The workbook is massive, plenty of stuff to pick from. There are clear visuals and memory aids throughout the book. It starts with associating numbers to their appropriate quantities and ends with some simple multiplication. Some pages can take a minute or two and some can take a half hour, which is nice for when your child's attention span is fleeting that day. Just the other day, I saw my daughter's preschool/daycare using the same workbook. I'm glad I spent the extra time to look at reviews-this workbook is awesome!

This book has been great for my 6 year old. She is able to read the instructions and set to work! Nicely put together and just challenging enough!

I tutor an elementary school child as a volunteer, and this book works great for me. I prefer it to many other brands of workbooks I have tried, in terms of its content and visuals.
