Synopsis

The new second edition of Getting to Know Web GIS features detailed, step-by-step exercises that teach readers how to share resources online and build web GIS applications easily and quickly. This workbook includes the latest upgrades and advances, such as smart mapping, AppStudio, ArcGIS Pro and scene services, and expands the use of ArcGIS Online, Portal for ArcGIS, ArcGIS for Server, Web AppBuilder for ArcGIS, and ArcGIS API for JavaScript.You do not have to be a developer to build web apps with little or no programming. Instead of focusing on individual products, this book teaches web GIS technologies as a holistic platform. In each chapter, students complete an application project using multiple products from the browser/client side to the server side. Data for completing the exercises is available for download.

Book Information

Series: Getting to Know ArcGIS

Paperback: 350 pages

Publisher: Esri Press; 2 edition (October 3, 2016)

Language: English

ISBN-10: 1589484630

ISBN-13: 978-1589484634

Product Dimensions: 7.5 x 0.9 x 9 inches

Shipping Weight: 2.5 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Customer Reviews

Pinde Fu is a project lead and senior GIS application developer at Esri. His specialties include web GIS technologies and applications in various industries. Several of his projects have won special achievement awards at Esri International User Conferences, and he received the Excellence.gov award from the American Council for Technology.

I have this book for a textbook. I have completed every assignment up to section 6 so far. This is the most frustrating textbook I’ve ever had. Here’s why:Screenshots in book often don’t help, for the

website now is changed. And you know how greyed out links on the internet means "if you click here nothing will happen, this link is dead"? Well, greyed out links work on this site, sometimes. Sometimes they don't.The book will tell you to go to a web page that's actually a tab, or a button, or a list. It calls down-arrows links. It says to "clear a selection" when it means "uncheck a box". It often pointlessly uses a m paragraph to tell you "don't bother clicking anything, just click ok".And if you skin over a pointless-looking paragraph, there will be some small three crucial words buried in it.You have to type in url's. And it gives you the long and/or complicated ones that must be carefully typed out--the weird character kind with percents, numbers, random capitalized letters mixed with random small letters, and such. Complicating this, the book is printed in a font where you often can't tell "one (1)" from "little L (l)". Most links have multiples of each in it.I just completed section 5 and two URL bit.ly links did not work--no matter how many times I retyped them with differing 1's and l's.

Thanks
