Synopsis

An unfamiliar noise stops shoppers in their tracks: cars and a truck are crashing into each other. Fortunately no-one is hurt seriously, but what has caused the accident? This book looks at the topics of forces and motion to explain about speed, acceleration, friction, and momentum. It shows how investigators can use their knowledge of science and technology to sift through the evidence to determine the cause of the crash.

Customer Reviews

my son (10 year old) loved this.. he examines every thing more closely as a result of reading this book! who doesn’t want a thinking son?

good product

Interesting for the young person with an investigative mind

Thanks!

need more informations..the way the author wrote was not so practical for kids
