I gave this book to a 6-year-old first grader. This is the third of the Thea Stilton series and the little girl I gave these books to got so hooked on them, she taught herself to read within a few weeks. Each book not only contains an exciting story line with complicated characters that behave in predictable ways, but it also contains sidebars with wonderful information about the geography,

culture, arts and sciences of the area where the story is taking place. The Mountain of Fire is set in Australia and so the reader learns about the geography and indigenous people of Australia, their tools, scientific tidbits, etc. The little girl who is reading this series reads the books over and over again, and everyone, including the adults, learns something. Parents can also go to YouTube or other internet sites while reading the sidebars to get video or images of what's being talked about. For example, this book introduces the boomerang, and YouTube has wonderful videos of how a boomerang works. Love these books!!!

i ordered these because  has a pretty good selection of childrens books, and my daughter and i can sit by the computer and look at many books in very little time , she has heard of these titled books before from her teacher at school , so i ordered them, she has enjoyed them very much ,she tells me about the storys and laughs at the plots of the story , you know a book is good when they read it twice, she reading them now, and i think she will read them again. she is 9years old. and an all A student at her school. She let her brother read some, and he liked them very much too.

This review is for the kindle version. It is not readable as the text is inside an image that just cannot be scaled to larger size. It is way too tiny in a Kindle Fire HDX or paper white with higher resolution.

Loved the story - it included the traditions on Australia and was very unique because they do not make two books alike

My granddaughter has read and enjoyed the Stilton Series as part of her 1,000,000 word and testing goal. She is shooting for 2,000,000 before school is out this year.

I thought this book was amazing so much I loved the way the author wrote it and was very impressed I personally think that you should also read this good book

This book is great for anyone (not just children) who wish to learn more about Australia, how people live there, its nature and the Aborigine culture. It opens your eyes to the beauty of that small, yet great continent.

It was such a good book .I knew Mortimer did it from the beginning and Nate was the good guy.You will love this book and don't forget to read the next adventure.Hope you enjoyed this book just as

much as I did.
