Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

It's a very thorough map to be sure, but very large, and you probably don't need the detail. The most popular one they sell in Baxter is $5 and very compact. Baxter is pretty easy to navigate, so you don't need overkill on the map.

Nice map of Maine - definitely worth buying if you plan to visit Baxter State Park. With acres and acres of pines, it's easy to get lost without a good map. This is the one you need

purchased for the vacation hiking trip to Baxter state park, well marked, durable.

Great map for an amazing state park. I highly recommend experiencing Baxter at some point in your life.

We were hiking Katahdin - Only draw back is I wish there was a blow up of the Katahdin Area

Printed on durable material and gave me what I needed, which is the trails on Mt. Katahdin. Fits compactly in my pack and is a good addition for hikers.

Great map, very detailed. The first time being at the park we were able to easily naviage around and plan out our hikes.

There are at least 2 trails in baxter park that need to be upgraded as they have changed as for the rest of the map I found the information very helpful in planning my recent hike up Katahdin
