Synopsis

NUMA crew leaders Kurt Austin and Joe Zavala must beat the clock to stop the world’s most dazzling new technological advance from becoming mankind’s last in this action-packed thriller from the New York Times best-selling grand master of adventure. When the most advanced aircraft ever designed vanishes over the South Pacific, Kurt Austin and Joe Zavala are drawn into a deadly contest to locate the fallen machine. Russia and China covet the radical technology, but the United States worries about a darker problem. They know what others don’t - that the X-37 is carrying a dangerous secret, a payload of exotic matter extracted from the upper reaches of the atmosphere and stored at a temperature near absolute zero. As long as it remains frozen, the cargo is inert, but if it thaws, it will unleash a catastrophe of nearly unthinkable proportions. From the Galapagos Islands to the jungles of South America to an icy mountain lake many believe to be the birthplace of the Inca, the entire NUMA team will risk everything in an effort to avert disaster...but they may be caught in a race that no one can win.

Customer Reviews

Clive cussler never disappoints his readers. Although I didn’t see his character in the book. I have read every book he has written. Thank you for all the knowledge

I never am disappointed by this series (the NUMA Files) under the Clive Cussler brand. There is always plenty of action, plenty of surprises and twists to the story, plenty of great interactions, and of

course the amazing escapes from death. No, you and I would be dead. But not our favorite characters! Like Superman, and without guns, they manage to survive the most impossible situations! Great reading!

Love Cussler books I have been reading them since 1971. Retired now, his books have taken me from Vietnam to the sandbox. Until 2003 you would always find a Cussler book in my sea bag. After 2003 my kindle became my reader. This was a good read and a fun book looking forward to his next book.

Like all the Cussler books, I loved it. I was surprised when the cargo was revealed, and had expected something else... to say more would be too big a spoiler though.... I'm not sure about the science since it's my hubbys area, not mine, but I loved the book!

Fast moving, geographically diverse, drama to retrieve a space-plane that was launched secretly by the U.S. intelligence community which returns from earth orbit prematurely. Several nations join in the race to find and retrieve what is left of the vehicle.

I like it when NUMA stays within the limits of far fetched reality mixed with a good detective story. The ending while fun couldn't quite save the plot from a preposterous story. Cusslers books often tire and weaken at the end. Maybe a soft landing would be a nice thing to adopt

Cussler has done it again. A good story that is hard to put down. While I don't like everything he has written, I do like most of them. Some more than others, so I will keep purchasing his books. What more can you say.

I thoroughly enjoyed another Clive Cussler novel with the usually good , and active characters! This one was exciting and thrilling to the last page. This is why I read and follow Cussler- I am always a satisfied reader!
