Synopsis

This paper presents Survey of Big Data Analysis using Predictive Analytics Algorithms and itÃ¢â ¬â„¢s Use-Cases. Data continues a massive expansion in diversity, scale and complexity. Data underpin activities in all areas of society. Achieving the full transformative potential from the use of data in this increasingly digital world requires both new data analysis algorithms as well as new generation of systems and distributed computing environments to handle the dramatic growth in the volume of data. The scientific community can use Hadoop MapReduce on huge server farms that monitor natural phenomena and/or the results of experiments. Community needs to analyse data gathered by server farms monitoring search results and to identify potential terrorist threats. In this paper we propose big data platform that is built upon open source and built on Hadoop MapReduce also we are working for implementing parallel lingo algorithm for getting the distinct search on search engines.This paper was published in IJICAR - International Journal of Integrated Computer Applications & Research - http://ijicar.com

Book Information

File Size: 746 KB

Simultaneous Device Usage: Unlimited

Publisher: IJICAR.COM (November 12, 2015)

Publication Date: November 12, 2015

Sold by:Ã Â Digital Services LLC

Language: English

ASIN: B017XXKPNS

Text-to-Speech: Enabled

X-Ray: Not Enabled

Word Wise: Not Enabled

Lending: Not Enabled

Enhanced Typesetting: Not Enabled
